## Invocation and options

- `\documentclass[xetex,compress,slidetop,9pt,aspectratio=169]{beamer}`
  - `xetex` activate macros for use with Xe<sup>La</sup>TeX.
  - `aspectratio=169` 16:9 display format (without the 4:3 format is used). The 16:9 implies the navigation “headline” on the right instead on the top of the slide
- `\usetheme<[options]>{Lannion}`
  - `serif` use a standard serif font
  - `font={Ubuntu}` use any other font installed on your system (do not use together with `serif`)
  - `noheadline` to not use navigation headline (or sidebar if `aspectratio=169` is used)
  - `nologo` does not display the Orange logo and changes coloring to a more private one
